

Dear FCC-I have been a subscriber to XM radio for approximately 10 months and during this period of time I have found that XM provides clear and constant signal for all of their programming. Another significant reason why we are satisfied with the XM service is when we travel we are able to receive local coverage for traffic and weather for the area we are located. If we are on an FM channel and we are travelling and need information on traffic and weather, we need to seek a channel who is providing this service in the local area. This is not always an easy and reliable option. However, when we need this service on our XM radio, we have 100% certainty that we have the correct channel with reliable and up to date information.

In addition, I feel very strongly that the limitation of broadcasting capabilities would infringe on my personal rights as a paying customer. I subscribe to XM for a reason. Please don't take away valuable services that are my right to receive as a paying customer.
